

# Ratchet Lever Hoist

Pul-Lift Model LE-D85 With Link Chain + Pul-Lift Model LE-C85 with roller chain

Lifting Equipment Ltd

## Lever Hoist

### Pul-Lift Model LE-D85 With Link Chain + Pul-Lift Model LE-C85 with roller chain

- Both in capacities from 750Kg - 10,000Kg
- The construction of this design provides an overall robust device
- The enclosed casing with cover, the hand lever and the lower block are manufactured from high tensile, white malleable cast iron.
- The load sheave for the link chain is manufactured from graphite cast iron and has precision machined chain pockets to provide an accurate fit for the load chain with added durability
- The roller chain sprocket is manufactured from chromium-molybdenum steel and heat treated, it also has precision machined teeth to allow the chain to move smoothly.

#### Optional Extras

- All models of this lifting equipment may be equipped with an overload prevention mechanism in the form of a slip clutch, this is set to approximately 25%± 15% overload
- Free chaining device available to rapidly attach the load, or pull chain through hoist in both directions
