Model LE-PT Pressed Steel Model

Lifting Equipment Ltd

Lever Hoist

Ratchet Lever Hoists, LE-PT Pressed Steel Model

The LE-PT model is the newest creation of ratchet lever hoists that features enhanced features and techniques, together with ergonomic styling, the LE-PT is the most universal ratchet lever hoist within the range, and is appropriate for virtually all standard operations, and with capacities ranging from 800Kg - 6300Kg

Key Features

- The proved stamped steel casing offers tremendously low weight without restricting the reliability and robustness of the unit
- The free chaining device is standard and allows the load to be attached rapidly or to pull the chain through the hoist in both directions.
- Low handle pull despite bigger capacities in addition to small hook to hook dimensions
- Fitted with zinc plated alloy chain and yellow chromate finish are in accordance with national and international standards and regulations
- Drop forged suspension and cargo hooks are manufactured from non- ageing, high tensile steel as well as fitted with tough safety catches.
- Short ergonomic hand lever with a rubber grip for safe and simple operation.
- Low overall height
