Lever Hoist

Ratchet Lever Hoists The LE Handy Model

The LE Handy ratchet lever hoist is the smallest and lightest hoist for specialized purposes. Because of the huge amount of application potential (industry, trade and service) this up-to-the-minute ratchet lever hoist is indispensable. The tremendously low tare weight along with the extremely compact design make the hoist easy to operate even in confined working places.

Key Features

- The drop forged suspension and cargo hooks, are manufactured from non aging, high tensile alloy steel
- The suspension and cargo hooks will bend under overload rather than breaking
- The hooks are fitted with robust safety catches and are free to turn throughout 360 degrees
- The short ergonomic hand lever makes the hoist easy to operate
- The enclosed design protects the inner elements from contamination
- All parts of the disc type load brake are manufactured from premium materials
- The LE-Handy is available in two models, the 250Kg and the 500Kg
- Both have one fall of chain (dimensions 4x12)
- The 250Kg net weight at standard lift is 2.2Kg, the 500Kg model is 2.8Kg
