

Disposable Slings

One way slings

Lifting Equipment Ltd

Disposable One Way Slings

Our one way slings are all manufactured in-house to BS 3481-3 from polyester or polypropylene with a safety factor of 5:1. These slings are used for the lifting and loading operation until they are off loaded at the final destination where the customer will use their own slings. Can be manufactured endless or with soft eyes each end in any length or safe working load.

Having our own machines on site enables us to carry out re-webs to customers own slings that have metal end fitting, then be retested and issued with a new test certificate, we are also able to manufacture special slings to any length, width and safe working load.

Re-webs with metal end fittings repainted & retested

Special manufacture slings with wear pads used to lift barges.
