

Swivel Eyebolts

Lifting Equipment Ltd

Swivel Eye Bolts

Lifting Gear Direct can supply a range of quality swivel eye bolts to provide secure fixing points which can swivel through 360 degrees and are able to pivot either 90 or 180 degrees depending on the model. They are available in metric and UNC threads with various shank lengths available.

Swivel eye bolts enable loading from various angles, unlike the standard fixed eye bolt and therefore provides multiple lifting positions as the swivel eye will adapt and adjust to the direction of the pull; added to this a further benefit is the fact that it can swivel completely through 360 degrees without the risk of the bolt twisting out.

Swivel eye bolts are commonly used in the manufacturing and material handling sectors to provide safer and more versatile anchor points from which to attach chains etc. than the standard, rigid eye bolt.

- Grade 100 Lifting Point are 360° rotation with 90° pivot function.
- Bolts are UNC thread (ASME/ANSI B18.3.1M), specification is a grade 10.9 alloy socket head screw per DIN EN ISO 4762.
- Proof Load individually to 2.5 times Working Load Limit and certified.
- Rated at 100% at 90° angle
- 100% magnaflux crack detection
